Subject: Re: Db Connections

Hi Christian, please see my answer here:

1. Yes, these are the all PBI / Ex. 4 applications in EMP system.
2. For staging database, here is the server information:

Hostname: PBI / Ex. 4
Port: PBI / Ex. 4
Service Name: PBI / Ex. 4

Each application module has its own connecting user, here is the details. I will send you password in separate email.

Application	Connecting User	Password
F	PBI / Ex. 4	
C		
E		
S		
E		

3. For database connection, you can download free PBI / Ex. 4 11g client which includes "PBI / Ex. 4 Developer" for you to view table structure and table data: PBI / Ex. 4

PBI / Ex. 4

I don't have PBI / Ex. 4 installed in my personal laptop. Currently I use "PBI / Ex. 4 r" to connect database as well. I am still waiting for my EPA laptop.

Please let me know if you need anything else.

Thanks!
Cindy

Subject: Db Connections

Hello Cindy!

I have several questions wrt the development (and staging, production) databases used by the subprojects: empadmin, equipment, fr, oildb, sma.

1. Are these 5 projects the entire set or are there more for the J[PBI / Ex. 4]web, and mobile under the scope of our work?
2. If there isn't already dev database(s), would you be able to setup dev database(s) for these projects? Our development team is ready to attempt connections via the servers. We would need dev database user account details (user/password, db server, database) for both the servers and [PBI / Ex. 4]clients for dev access.
3. Which db client do you recommend? I/we have used various clients in the past, and Toad is one that we could use. There are 30 day trial versions we could download/install, but there may be EPA licenses for some of these for developers.

Thanks in advance.

Subject: RE: Development Estimate Fields Added To JIRA

Hi Colleen
Thanks for putting these in JIRA. To the questions asked we will need a requirements meeting with the PROD personnel to find out what they really want and were the new data.

Before we really can prioritize anything we need to have a FR Change Control Board Meeting. Skip Weisberg and David Wynn are on the Board as well as us. Will PROD personnel: Craig Beasley, Steve Ridenour, or Jon Petit be on the call for that CCB meeting? I'm not sure, they rarely make the monthly SHEM/FR work group meetings. The Change Control Board was mandated by OMB's FISMA through NIST 800-53 Rev. 4 document (including the Security Controls that covered CCB). Yet I do applaud the prompt initiatives!!! ☺

We can talk more at the 4pm call and our weekly status meeting. Their approach was out of the internal control and procedures for development. Thanks again. ☺

Rob

Subject: RE: Development Estimate Fields Added To JIRA

Hi Colleen,

For OEM-52, which page does user like to add these two fields? Also do they need to be displayed in PBI / Ex. 4 report as well? In FR, there is a "Employee Contact Information" page and it shows FR employee's work email, phone number and FR type, etc. Does user like to add the new fields on this page?

Here is another search employee page. Does user like to add these two new fields in here as search criteria also:

Also is any existing record needed to be migrated in database?

Thanks!
Cindy

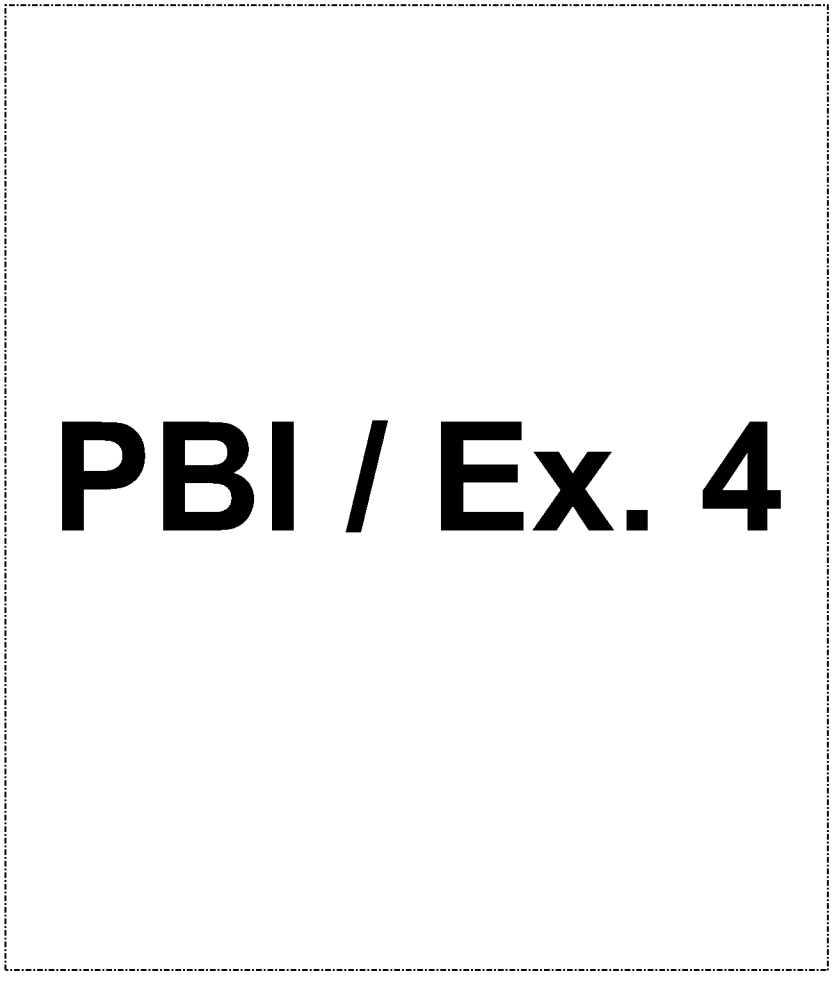
Subject: RE: Development Estimate Fields Added To JIRA

Hi Folks,

Below are the four tickets that were added per Rob's email. Below that is the email that Rob got from his supervisor regarding these. In that, she is asking for estimates by COB Monday, 3/19. Rob may have gotten further information after that about extending the due date, but just wanted to let everyone know what the email that Rob forwarded to us said about due dates…

Thanks!

Colleen



Hi Rob,

Please see attached a requested "wishlist" from PROD on desired modifications to the FR module. By COB Monday, 3/19, please work with your contract developers to develop an estimated timeline for addressing the requests in the attachment (meaning, please review the document and jointly identify an estimated completion date for each item). The high priority requests should be addressed first. Please return this document with the estimated completion dates added to me by COB Monday, 3/19.

If you would like to talk more about this, I am happy to do so. Thanks,

Julie

Subject: Development Estimate Fields Added To JIRA

Hey Rakhi and Christian,

Just a heads up that I have added two new fields to our JIRA tickets, Development Estimate 1 and Development Estimate 2. Because JIRA fields are global, I wanted to name the something non-specific to the EMP project in case other projects want to include them in their fields. They are numeric fields, so you can simply put an hours estimate into them when you think you've assessed hours required to develop / handle a ticket. We will not need to do this for every ticket, but when Rob wants us to estimate LOE, this is how we can do it. I don't care which of you uses which field – you can agree between you that Rakhi is always 1, Christian is always 2 (or vice versa) or you can simply use the 1st field if you're the first developer to estimate a particular ticket. Whatever works, we just need estimates from both of you and we will use the higher or the two when planning for turn-around time.

Collen – When you have a chance, you'll want to direct Rakhi and Christian to the FR tickets you made yesterday based off of Rob's list he received. They'll need to estimate LOEs for those in the next week or so.

Thanks guys.

Hi Cindy and Swetha

You needn't put it in a worksheet, just writing comments with your name like CINDY: in each of the files will work just as well and most likely faster for you two. But it would be a pass around approach going that route (first Cindy, then Swetha, etc.)

Subject: FW: Property Files
Importance: High

Hi Cindy and Swetha,

This slipped my mind on the status call today, but Christian had asked about property files earlier this week and he put together a spreadsheet.

As the only incumbents, you two may be the only ones who have any real updates for this. See below and attached from Christian.

One additional note – for dev and staging if you can fill in the blanks for the links, urls, email servers, etc (whatever you know). For production, we don't need the values but only whether they are required or not.

Thanks guys.

Subject: Property Files
Importance: High

Hi Ed

I have attached two sets of files:

FILES.zip: These are all the **property** files for staging across all projects (excluding mobile) thus far. I may have more but this is the initial complete set.
ALLPROPERTIES.xlsx: This is a worksheet they can fill in the values for things that are related to their work.

Cindy and others should recognize each of the properties that pertain to them and document them in the all properties worksheet. They need to examine the properties closely so they can provide input and we need to know that they went thru
each file so Java dev team isn't waiting on missing items.

They should be able to say for DEV, STAGE, and PROD whether the system requires it. They needn't fill out the production links, urls, etc. as those are already determined by NCC. I'm basically looking for what they should be set to or whether they aren't being used anymore or only on stage and dev, etc,

For all PBI / Ex. 4 related core PBI / Ex. 4 I already know the settings already for dev and staging).

Thanks.

Hi Cindy

Question: Is it normal to require an application login for each application:

EMPADMIN
FR
EQUIPMENT
OILDB
SMA

Is there such a thing as SSO for all the apps? If so, is it via **PBI / Ex. 4** Curious, because I have logged in for OilDB, FR…

Subject	EMP Team Meeting Minutes	
Date and Time	3/13/2018 2:00 P.M. – 3:00 p.m. EST	
Meeting Location / Dial in Info	Conference Line - Conference Line/Access Code - Ex. 6 Access Code Conference Line/Access Code - Ex. 6	
Chairperson	Thomas, Rob	
In Person Participants	Thomas, Rob; Campbell, Ed; Goods, Lawanna; McCarthy, Colleen; Leckner, Christian; Madhavan Nair Kamala Devi, Rakhi, Chilivery, Swetha; Fan, Cindy (Yanqian)	
Telephone Participants		
Collaboration		

1		1. Rob: The documents that we need for the immunization information that will be stored in FRM are already approved for this year. The submission year goes fall to fall, so this fall they will be updated again. Right now Rob is waiting on information from Dave Gibson's team. 2. Rob and LaWanna: The immunization data is PII. 3. Ed: We put in a JIRA ticket to make our applications (as much as possible) have the same "Look and Feel" of the application that we saw in the geocoding demo. 4. Rob: We need a meeting on the DB link that Cindy is working on for the Oil DB to get more information on critical services. 5. Rob: In addition to our current audit, we have had four previous audits in the years 2004, 2011, 2014 and 2018. The 2014 audit required that we implement an asset tracking application, and that is where Sunflower comes in. 6. Rob: We need to give the current auditor (Kevin) either the ability to run the reports that he needs, or have someone run those reports for him

Hi Cindy and Swetha

You needn't put it in a worksheet, just writing comments with your name like CINDY: in each of the files will work just as well and most likely faster for you two. But it would be a pass around approach going that route (first Cindy, then Swetha, etc.)

Hi Cindy and Swetha,

This slipped my mind on the status call today, but Christian had asked about property files earlier this week and he put together a spreadsheet.

As the only incumbents, you two may be the only ones who have any real updates for this. See below and attached from Christian.

One additional note – for dev and staging if you can fill in the blanks for the links, urls, email servers, etc (whatever you know). For production, we don't need the values but only whether they are required or not.

Thanks guys.

Hi Ed

I have attached two sets of files:

FILES.zip: These are all the **property** files for staging across all projects (excluding mobile) thus far. I may have more but this is the initial complete set.
PBI / Ex. 4 This is a worksheet they can fill in the values for things that are related to their work.

Cindy and others should recognize each of the properties that pertain to them and document them in the all properties worksheet. They need to examine the properties closely so they can provide input and we need to know that they went thru
each file so **PBI / Ex. 4** team isn't waiting on missing items.

They should be able to say for DEV, STAGE, and PROD whether the system requires it. They needn't fill out the production links, urls, etc. as those are already determined by NCC. I'm basically looking for what they should be set to or whether they aren't being used anymore or only on stage and dev, etc,

For all PBI / Ex. 4 elated core (PBI / Ex. 4 I already know the settings already for dev and staging).

Thanks.

Subject: RE: Code from EPA Site

Sure Christian! Just to clarify, by saying "wrongly pointed" I meant when we import the project, by default its build path PBI / Ex. 4 dependencies are configured to look into a local folder in the user's '**PBI / Ex. 4****'. It won't work as is. We need to modify these to pick the PBI / Ex. 4 up from our local path where ever we have the jars located.
Also meant to say the files we got from Salient might have come from a local machine instead from a repository.

Thanks,
Rakhi

Also Rakhi,

They weren't wrongly pointed – they just pointed it to where they had wanted it to be. I am going to hopefully see what's on staging so I can decide what's going into our project setup and what isn't.

Hello Rakhi

I was able to build without using the approach you had taken thus far where you needed to comment out config files, etc.

I had to do several things to get it to build. Once we see staging we will have more definitive answers as to latest versions, etc. and I can lay out the project setup steps, etc. Hopefully, Ed and Ali can have Paula provide us access or a server admin, etc.

Subject: RE: Code from EPA Site

Hi Christian,
That's true! They have used different versions of dependency PBI / Ex. 4 in different projects. It would be good to know get the latest one which went to prod/staging.

For me, oil DB had built successfully after I fixed the buildpath issues. By default, the PBI / Ex. 4 were wrongly pointing to a some PBI / Ex. 4 library. I have deleted those and made it point to the ones in my local. I also added some missing PBI / Ex. 4 from PBI / Ex. 4 to here. That suggests, the files we got were from a developer's local PBI / Ex. 4. (Image below).

For EMP admin , as we discussed, the PBI / Ex. 4 in the xml is giving error; Commenting it out builds the project . In all the projects, PBI / Ex. 4 files are error free after fixing the buildpath issues and PBI / Ex. 4 references. Outstanding errors are in the webContent. Most of them have to do with PBI / Ex. 4 variables used in jsp scriptlets.

Thanks,
Rakhi

Hello Ed et al.

Just looking at the project files in PBI / Ex. 4 empadmin and sma had built successfully. The other projects (equipment, fr, oildb), excluding mobile (which is done differently and requires other tools and not a priority) failed to build. This is even more reason to have an accurate mirror of what's on staging (and/or production) PBI / Ex. 4 packages, etc.

PBI / Ex. 4

Subject: RE: Regarding geoDataSource

Hello Rakhi

It is being used for the GeoDataSource class and on staging it is the envirodb.

Rakhi,

Is it possible to check Java code behind this button in Oildb: tab "Address"-->click Edit-->click "Find lat/long from Address". There shall be a function retrieved GEO data. Please let me know what you find.

Thanks!
Cindy

Ok! Interesting! This is used in the property file of the code Salient shared. I couldn't find any references for "E PBI / Ex. 4 ' in the code. Do you know the connection details? (Also if it is safe to be accessed from developer pcs?)

Thank you for letting us know Cindy!

Thanks,
Rakhi

Subject: Re: Regarding geoDataSource

Hi Rakhi,

Hmm...the database " PBI / Ex. 4 " was dropped several years ago in Salient. If I remember it correctly, the Oildb possibly uses a DBLink " PBI / Ex. 4 " to access a remote GEO database. Do you see anywhere use " PBI / Ex. 4 " in Oildb PBI / Ex. 4 code?

Thanks!

Cindy

Subject: Regarding geoDataSource

Hi Cindy,
I came across this 'geo Data source 'connection url in the OilDB application. In the Salient given code, the connection string, useName/password is as below. Do you think if there is an equivalent one in staging DB ?

PBI / Ex. 4

Thanks,
Rakhi

Hi Ed,
Christian was suggesting once we get access to the Staging environment and get access to the files, we might be able to find all the dependencies from there.
At this point of time, we do not have all the dependency PBI / Ex. 4 and their versions.

Thanks,
Rakhi

Rakhi / Christian,

I wanted to follow-up on this statement:

We found the source code they provided doesn't have all the dependency PBI / Ex. 4 required to build and run the project.

Is this still a true statement, or have we found what we needed at this point?

Thanks to you both.

Ed

Subject: RE: Project Dependencies

Hi Ed et all,
Sorry! I don't mean to hijack the thread! ☺ I would like to clarify few points related to this thread.

1. We found the source code they provided doesn't have all the dependency PBI / Ex. 4 required to build and run the project. They have added only 4 jars in EMP admin for example. It would be great if we have a way to know the list of dependency PBI / Ex. 4 with exact version numbers for all the projects(We could take the latest PBI / Ex. 4 but we may run into compatibility issues. Knowing the correct version would save time rather than trial and error). If there is a source control branch with the code version in prod with all the dependencies, that would be good enough.

2. Would Salient instead be willing to answer our outstanding queries in a mail or shared location if we have any while we try to bring up our local environment and test environments?

Thanks,
Rakhi

Subject: RE: Project Dependencies

Hey Christian –

I did reach out to Elliot (Salient) last week, to ask if he'd be willing to help us with a transition meeting or perhaps putting you in touch with his lead developer. I think you might have seen that reply, but just in case – he was basically unwilling to commit any time to help us transition at this point. Apparently the resources that used to assist with this work are already fully allocated to other projects.

I think we are just going to have to make some assumptions here and/or learn some of these answers the hard way, unfortunately.

I know you sent me a long list of software you will use, which was appreciated. There's probably a subset of that software list that'll you need on your local environment that will require licenses – that's the list I really need to reach out to Rob / EPA and get them started on acquiring licenses for you, though.

It sounds like (from Elliot's January status email to Rob) that Mobile development had been on hold for a little while. I would say that it makes sense to prioritize standing up the ability to support the applications initially, and worry about mobile down the road (in a few weeks).

Thanks

Subject: Project Dependencies

Hello Ed,

Any success on gathering the software list that was used on the various projects from Salient? Software list would need to include the name and versions of each release for both
Software installations such as **PBI / Ex. 4**, as well as library dependencies for backend, web, and mobile.

Also, we would need to look into getting licenses for the larger installations such as **PBI / Ex. 4** etc.

Best
Christian

Hi Ed,

I just spoke to Swetha, and she cannot open PBI / Ex. 4, so maybe just needs access to it.

Thanks!

Colleen

Hi Cindy,

I'm unable to open the file. I'm getting an error message as 'Oops, you've found a dead link'.

Hi Colleen/Ed,

Can you please let me know whom should I reach out to fix this issue. I'm not able to open the other links too that Colleen has sent.

Regards,
Swetha

Subject: database user & password

Hi team,

I just uploaded a spreadsheet "EMP database password.xlsx" in here:
PBI / Ex. 4

Please let me know if you can't open the file.

Thanks!
Cindy
